

Physicians

Physicians like the AfterOurs Urgent Care Model!

Unlike most urgent care companies, AfterOurs Urgent Care receives a large volume of patients through physician referrals. Approximately 25% of our patients are referred to us through their family physician.

Why?

- We offer non-competitive hours of service – night, weekend, and holiday hours
- We don't provide primary care physician services – no annual physicals, pediatric vaccinations, etc.
- We don't prescribe long term medications and treatments – no diabetes management, etc.
- We forward treatment records to physicians for follow-up care
- Our staff refers nearly 1000 patients to primary care providers and specialist each month
- We do not provide follow-up care, unless requested by a physician
- We staff board certified family physicians and competent support staff
- We direct patients to the most appropriate place of service – even when it's not an AfterOurs facility
